VIRGO[®]
G R O U P

The Virgo Group of companies constantly locks out innovation and challenges in the industry across its group companies. It maintains a philosophy of reaching out to perfection, no matter what it takes. Whether high-end resources or superlative manpower with a team size of over 3,000+ employees, Virgo Group's employees spread across the nation are working together in a rewarding environment to achieve the objectives of the company founded upon, long before government-issued regulations concerning the protection of the environment, Virgo Group had already invested in "environment-friendly" initiatives. These included reforestation programs and the elimination of the use of tropical woods and harmful ozone-damaging chemicals. We are taking its actions on a philosophical pedestal. Virgo today has evolved into a dynamic group that has been generating optimum profit through the total satisfaction of customers, suppliers, employees, and society.

SECRETS THE WORLD HAS NEVER HEARD

oh

WHAT A STORY!

VIRGO[®] **PVC**
LAMINATES

PVC laminates are a type of decorative surface material used for furniture, cabinetry, and interior finishes. They are known for their durability, ease of maintenance, and moisture resistance. At Virgo, we offer a wide range of PVC laminates that blend exceptional design with functionality, making them popular for use in kitchens, bathrooms, and other high-traffic areas. Available in various designs, colors, and textures, our laminates provide numerous aesthetic options to suit any interior.

90° BENDABLE PVC LAMINATE

A REAL EDGE LESS COLOR CORE

PVC laminates are 90 degree bendable, which means it can be folded and bented up to 90 degrees and easily applied at the edges too. With this simple bending technology, these laminates can give your furniture a smooth and seamless edge and also a colour core look and feel, so those edgy and sharply visible joints will never ruin the aesthetics of your kitchen cabinets or any other furniture.

90° Bending Process / Steps

STEP-1
cut your sheets as per your desired dimensions

STEP-2
use v-groove cutter to mark a groove (to bend) on the sheet

STEP-3
next use a regular pair of scissors and trim the edge out

STEP-4
place the sheet front up and use the groove marks to bend the sheets towards outside

STEP-5
now your sheet is ready to be use

DIAMOND CUTTER BLADE

For cutting, routing and drilling, we only recommend using a diamond cutter blade. To avoid any burrs during cutting ensure all the blades are sharp. A smooth file can be used to feather all the corner edges.

CIRCULAR SAW BLADE

A 4"x8mm x 6 Tee Radius C – groove blade should be used for bending Virgo PVC laminates. The recommended groove depth is 0.8 mm & width 5 mm or more. Routed sheet will easily bend up to 90°.

Actual Sheet Thickness

Disclosure - Sample Thickness

ADVANTAGES WITH VIRGO PVC

Laminates made with matching layers of colors throughout are called color core laminates. These laminate sheets are mostly used to eliminate the dark seams, which appear on the edges & joints of regular laminates. Color core laminates are known for the consistent, edgeless, and seamless look they give to furniture. Our color core range is available in Glossy and Matt finishes with a wide range of vibrant color options to choose from.

● THICKNESS -

1.2mm, +- 10% Standard

● SHEET SIZE -

1220mmx2440mm [Standard]

● SIZE OPTION -

Length - Any [On Request]
Width - Upto 1220mm

● RANGE -

Our PVC Laminates are available in a variety of range. Customized sizes & shades can be developed on request.

● ADHESIVE -

These laminates are easy to apply with the standard laminating system, including most of the conventional adhesive normally used with plastic laminates such as many water based and solvent based. We do not recommend the use of heat activated adhesives.

● LAMINATION -

Proper substrates must be used and careful bonding procedures must be observed. Substrates should be of good quality plywood, high density particle board, high Quality Fiber board, or PVC board. The face of the substrates must be smooth and free of grease, wax, dust, chips and other foreign matter.

We do not recommend use of PU base, Melamine, lamination (wax) on our laminates. The application of these will spoil the originality and natural beauty of the High Gloss PVC Flexible Sheets.

● CUTTING & INSTALLATION -

These High Gloss PVC Flexible Sheets can be cut, routed and drilled with most standard wood working too, or equipments. All blades must be sharp to remove any burrs that may occur in the cutting process. We recommend the use of a leather to smooth all corner edges.

● BENDING AND FORMING -

These laminates can be bent and all radius bending should be handled in the same manner as all grades of non post forming decorative laminates.

Use only U-Groove cutter to bend the sheets at 90 degree. In case of any difficulty please contact us.

● MAINTENANCE -

Any cleaning agent containing acids, alkalis or abrasive should not be used to clean the High Gloss Flexible Sheets. We recommend to use only clean water for cleaning of sheets.

Note: Virgo warrants that all its products are free from manufacturing defects and perfectly ideal for use in normal conditions. In case of any claim, the liability of the company is only limited to the cost of the product only. These may be color variations from batch to batch. The sample swatches in the catalogue represents the designs, colours and ruches. They do not represent the Actual sheet.

KINDLY REMOVE THE PROTECTIVE FILM WITHIN 7 DAYS OF INSTALLATION OF LAMINATES.
